

# Contents

<b>Chapter 1</b>	<b>Computer Vision Overview .....</b>	<b>1</b>
1.1	Human Vision and Characteristics .....	2
1.1.1	Visual characteristics .....	2
1.1.2	Brightness properties of vision .....	3
1.1.3	Spatial properties of vision .....	6
1.1.4	Temporal properties of vision .....	8
1.1.5	Visual perception .....	11
1.2	Computer Vision Theory and Framework .....	13
1.2.1	Research goals, tasks, and methods of computer vision .....	13
1.2.2	Visual computational theory .....	14
1.2.3	Framework problems and improvements .....	20
1.3	Three-Dimensional Vision System and Image Technology .....	23
1.3.1	Three-dimensional vision system process .....	23
1.3.2	Computer vision and image technology level .....	24
1.3.3	Image technology category .....	25
1.4	Overview of the Structure and Content of This Book .....	27
1.4.1	Structural framework and main content.....	27
1.4.2	Chapter overview .....	28
1.5	Key Points and References for Each Section .....	29
	Self-Test Questions .....	30
	References .....	33
<b>Chapter 2</b>	<b>Camera Calibration .....</b>	<b>37</b>
2.1	Linear Camera Model .....	38
2.1.1	Complete imaging model .....	38
2.1.2	Basic calibration procedure .....	40
2.1.3	Internal and external parameters .....	41
2.2	Non-Linear Camera Model .....	44
2.2.1	Types of distortions .....	44
2.2.2	Calibration steps .....	47
2.2.3	Classification of calibration methods .....	48
2.3	Traditional Calibration Methods .....	49
2.3.1	Basic steps and parameters .....	49
2.3.2	Two-stage calibration method .....	51
2.3.3	Precision improvement .....	56
2.4	Self-Calibration Methods .....	57
2.5	Key Points and References for Each Section .....	61
	Self-Test Questions .....	61
	References .....	65
<b>Chapter 3</b>	<b>Three-Dimensional Image Acquisition .....</b>	<b>67</b>
3.1	High-Dimensional Image .....	68
3.2	Depth Image .....	69
3.2.1	Depth image and grayscale image .....	69

3.2.2	Intrinsic image and non-intrinsic image .....	70
3.2.3	Depth imaging modes .....	72
3.3	Direct Depth Imaging .....	73
3.3.1	Time-of-flight method .....	74
3.3.2	Structured light method .....	77
3.3.3	Moiré contour stripes method .....	79
3.3.4	Simultaneous acquisition of depth and brightness images .....	83
3.4	Stereo Vision Imaging .....	84
3.4.1	Binocular horizontal mode .....	85
3.4.2	Binocular convergence horizontal mode .....	89
3.4.3	Binocular axial mode .....	92
3.5	Key Points and References for Each Section .....	95
	Self-Test Questions .....	95
	References .....	99
<b>Chapter 4</b>	<b>Video Image and Motion Information .....</b>	<b>101</b>
4.1	Video Basic .....	102
4.1.1	Video expression and model .....	102
4.1.2	Video display and format .....	104
4.1.3	Color TV system .....	106
4.2	Motion Classification and Representation .....	108
4.2.1	Motion classification .....	109
4.2.2	Motion vector field representation .....	109
4.2.3	Motion histogram representation .....	111
4.2.4	Motion track description .....	113
4.3	Motion Information Detection .....	114
4.3.1	Motion detection based on camera model .....	114
4.3.2	Frequency domain motion detection .....	118
4.3.3	Detection of movement direction .....	121
4.4	Motion-Based Filtering .....	123
4.4.1	Motion detection-based Filtering .....	123
4.4.2	Motion compensation-based Filtering .....	124
4.5	Key Points and References for Each Section .....	130
	Self-Test Questions .....	131
	References .....	134
<b>Chapter 5</b>	<b>Moving Object Detection and Tracking .....</b>	<b>135</b>
5.1	Differential Image .....	136
5.1.1	Calculation of difference image .....	136
5.1.2	Calculation of accumulative difference image .....	138
5.2	Background Modeling .....	139
5.2.1	Basic principle .....	140
5.2.2	Typical practical methods .....	140
5.2.3	Effect examples .....	143
5.3	Optical Flow Field and Motion .....	145
5.3.1	Optical flow equation .....	145

5.3.2	Optical flow estimation with least square method .....	146
5.3.3	Optical flow in motion analysis .....	147
5.3.4	Dense optical flow algorithm .....	150
5.4	Moving Object Tracking .....	153
5.4.1	Kalman filter .....	154
5.4.2	Particle filter .....	155
5.4.3	Mean shift and kernel tracking .....	160
5.5	Key Points and References for Each Section .....	164
	Self-Test Questions .....	164
	References .....	167
<b>Chapter 6</b>	<b>Binocular Stereo Vision .....</b>	<b>169</b>
6.1	Stereo Vision Process and Modules .....	170
6.1.1	Camera Calibration .....	170
6.1.2	Image Acquisition .....	170
6.1.3	Feature Extraction .....	171
6.1.4	Stereo Matching .....	171
6.1.5	3-D Information Recovery .....	172
6.1.6	Post-Processing .....	172
6.2	Region-Based Stereo Matching .....	173
6.2.1	Template matching .....	174
6.2.2	Stereo matching .....	177
6.3	Feature-Based Stereo Matching .....	185
6.3.1	Basic steps and methods .....	186
6.3.2	Scale-invariant feature transformation .....	190
6.3.3	Dynamic programming matching .....	192
6.4	Error Detection and Correction of Parallax Map .....	194
6.4.1	Error detection .....	194
6.4.2	Error correction .....	196
6.5	Key Points and References for Each Section .....	198
	Self-Test Questions .....	199
	References .....	203
<b>Chapter 7</b>	<b>Monocular Multiple Image Recovery .....</b>	<b>205</b>
7.1	Photometric Stereo .....	206
7.1.1	Light source, scenery, lens .....	207
7.1.2	Scene brightness and image brightness .....	208
7.1.3	Surface reflection characteristics and brightness .....	213
7.2	Shape from Illumination .....	216
7.2.1	Representation of the surface orientation of a scene .....	216
7.2.2	Reflectance map and brightness constraint equation .....	218
7.2.3	Solution of photometric stereo .....	222
7.3	Optical Flow Equation .....	225
7.3.1	Optical flow and motion field .....	226
7.3.2	Solving optical flow equation .....	229
7.4	Shape from Motion .....	237

7.5	Key Points and References for Each Section .....	240
	Self-Test Questions .....	241
	References .....	245
<b>Chapter 8</b>	<b>Monocular Single Image Recovery .....</b>	<b>247</b>
8.1	Shape from Shading .....	248
8.1.1	Shading and orientation .....	248
8.1.2	Gradient space method .....	250
8.2	Solving Brightness Equation .....	253
8.2.1	Linearity case .....	254
8.2.2	Rotational symmetry case .....	256
8.2.3	The general case of smoothness constraints .....	258
8.3	Shape from Texture .....	260
8.3.1	Monocular imaging and distortion .....	260
8.3.2	Orientation restoration from the change of texture .....	263
8.4	Detection of Texture Vanishing Points .....	271
8.4.1	Detecting the vanishing point of line segment texture .....	271
8.4.2	Determine the vanishing point outside the image .....	273
8.5	Key Points and References for Each Section .....	276
	Self-Test Questions .....	277
	References .....	281
<b>Chapter 9</b>	<b>Three-Dimensional Scenery Representation .....</b>	<b>283</b>
9.1	Local Features of the Surface .....	284
9.1.1	Surface normal section .....	284
9.1.2	Surface principal curvature .....	285
9.1.3	Mean curvature and Gaussian curvature .....	286
9.2	Three-dimensional Surface Representation .....	288
9.2.1	Parameter representation .....	288
9.2.2	Surface orientation representation .....	291
9.3	Construction and Representation of Iso-Surfaces .....	294
9.3.1	Marching cube algorithm .....	295
9.3.2	Wrapper algorithm .....	298
9.4	Interpolating Three-dimensional Surfaces from Parallel Contours .....	300
9.4.1	Contour interpolation and tiling .....	300
9.4.2	Problems that may be encountered .....	302
9.4.3	Delaunay triangulation and neighborhood Vorono ïdiagram .....	304
9.5	Three-dimensional Entity Representation .....	306
9.5.1	Basic representation scheme .....	306
9.5.2	Generalized cylinder representation .....	309
9.6	Key Points and References for Each Section .....	311
	Self-Test Questions .....	312
	References .....	316
<b>Chapter 10</b>	<b>Generalized Matching .....</b>	<b>317</b>
10.1	Matching Overview .....	318

10.1.1	Matching strategies and categories .....	318
10.1.2	Matching and registration .....	321
10.1.3	Matching evaluation .....	323
10.2	Object Matching .....	324
10.2.1	Measure of matching .....	324
10.2.2	Corresponding point matching .....	327
10.2.3	String matching .....	329
10.2.4	Matching of inertia equivalent ellipses .....	329
10.2.5	Shape matrix matching .....	331
10.3	Dynamic Pattern Matching .....	333
10.3.1	Matching process .....	333
10.3.2	Absolute pattern and relative pattern .....	334
10.4	Graph Theory and Graph Matching .....	336
10.4.1	Introduction to graph theory .....	336
10.4.2	Graph isomorphism and matching .....	340
10.5	Line Drawing Signature and Matching .....	343
10.5.1	Contour marking .....	343
10.5.2	Structural reasoning .....	344
10.5.3	Labeling via backtracking .....	346
10.6	Key Points and References for Each Section .....	347
	Self-Test Questions .....	348
	References .....	353
<b>Chapter 11</b>	<b>Knowledge and Scene Interpretation .....</b>	<b>355</b>
11.1	Scene Knowledge .....	356
11.1.1	Model .....	356
11.1.2	Attribute hypergraph .....	358
11.1.3	Knowledge-based modeling .....	360
11.2	Logic System .....	362
11.2.1	Predicate calculation rules .....	362
11.2.2	Inference by theorem proving .....	366
11.3	Fuzzy Reasoning .....	369
11.3.1	Fuzzy sets and fuzzy operations .....	370
11.3.2	Fuzzy reasoning method .....	372
11.4	Scene Classification .....	375
11.4.1	Bag of word/feature model .....	375
11.4.2	pLSA model .....	378
11.5	Key Points and References for Each Section .....	383
	Self-Test Questions .....	384
	References .....	387
<b>Chapter 12</b>	<b>Spatial-Temporal Behavior Understanding .....</b>	<b>389</b>
12.1	Spatial-Temporal Technology .....	390
12.1.1	New research field .....	390
12.1.2	Multiple levels .....	391
12.2	Spatial-Temporal Interest Point Detection .....	392

12.2.1	Detection of points of interest in space .....	392
12.2.2	Detection of points of interest in space and time .....	393
12.3	Spatial-Temporal Dynamic Trajectory Learning and Analysis .....	396
12.3.1	Automatic scene modeling .....	396
12.3.2	Path learning .....	399
12.3.3	Automatic activity analysis .....	403
12.4	Spatial-Temporal Action Classification and Recognition .....	405
12.4.1	Motion classification .....	405
12.4.2	Action recognition .....	407
12.5	Key Points and References for Each Section .....	414
	Self-Test Questions .....	414
	References .....	418
<b>Appendix A</b>	<b>Visual Perception .....</b>	<b>419</b>
A.1	Shape Perception .....	419
A.2	Spatial Perception .....	421
A.2.1	Non-visual indices of depth .....	421
A.2.2	Binocular indices of depth .....	422
A.2.3	Monocular indices of depth .....	424
A.3	Motion Perception .....	427
A.3.1	The condition of motion perception .....	427
A.3.2	Detection of moving objects .....	429
A.3.3	Depth motion detection .....	429
A.3.4	Real motion and apparent motion .....	430
A.3.5	Correspondence matching of apparent motion .....	430
A.3.6	Aperture problem .....	432
A.3.7	Dynamic indices of depth .....	433
A.4	Key Points and References for Each Section .....	434
	References .....	434
	<b>Answers to Self-Test Questions .....</b>	<b>435</b>
	Chapter 1 Computer Vision Overview .....	435
	Chapter 2 Camera Calibration .....	436
	Chapter 3 Three-Dimensional Image Acquisition .....	436
	Chapter 4 Video Image and Motion Information .....	437
	Chapter 5 Moving Object Detection and Tracking .....	437
	Chapter 6 Binocular Stereo Vision .....	438
	Chapter 7 Monocular Multiple Image Recovery .....	439
	Chapter 8 Monocular Single Image Recovery .....	439
	Chapter 9 Three-Dimensional Scene Representation .....	440
	Chapter 10 Scene Matching .....	440
	Chapter 11 Knowledge and Scene Interpretation .....	441
	Chapter 12 Spatial-Temporal Behavior Understanding .....	442
<b>Index .....</b>		<b>443</b>
